EXPERIENCE

Celebal Technologies

Jaipur, India

Data Science Intern

03-Jun-2024 – 03-Aug-2024

- Completed an internship program under the Data Science domain, gaining hands-on experience and demonstrating hard work and diligence throughout the duration.

CodeTrade India Pvt. Ltd.

Jaipur, India

Software Engineer |

19-May-2025 – Present

- Develop and customize Odoo applications using Python to meet business needs.
- Integrate third-party systems like Shopify, Magento, Stripe, Tap Payment, and Grubtech POS using APIs.
- Analyze client requirements and implement effective, tailored software solutions.

PROJECTS

YouTube Backend

- Developed a full Youtube like backend with user accounts, Channels, Profiles, Video Upload, Thumbnails, Publishing, Likes/Dislikes and other key features.
- Connected MongoDB and Cloudinary to store application data and uploaded videos and images.

Image Generation Platform

- I created a full-stack website which allows users to input a prompt, generate images using a Hugging Face model, and then view, download, and save the images they have generated.
- Integrated Hugging Face model on the website, managing image generation and storing the created images with Cloudinary.
